

## *Journey into Space*

Crammed into a tiny space  
2 hours waiting for launch  
Strapped in - nearly ready  
Bash! Clash! Clang!  
Weird noises below me  
Thump! Bump!  
Valves opening and closing  
The rocket starts to shake  
Boom! Bang! Crack!  
The noises are getting louder  
Final rocket preparations  
Then we're off  
I am beginning to move  
Now I'm scared  
Boom! Clash! Crash!  
Like a giant beast waking up  
I'm off the launch pad  
In the air  
I am getting faster  
Building up speed  
There is a shake and rattle  
What have I got myself into?  
BANG  
The rescue system is jettisoned  
Another BANG  
The four strap-on boosters separate  
The windows are uncovered  
BOOM  
The nose faring comes off  
The g-loads drop  
There is a big push forward  
BANG  
JERK  
The sky is getting dark  
I am now in Space.
